

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Newly retired, after spending several years working with his brother to develop their crane business into an market leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

During their trip, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial market for a product that could promptly and securely elevate people in the air to accomplish upkeep and other construction functions.

After returning from their holiday, John set up a joint venture with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into a number of global marketplaces and continues to cultivate contemporary machines to ensure that customers are able to become safer and more efficient within their workplace.
